## CENTRAL GOVERNMENT DEBT INCLUDING ON-LENDING AND ASSETS UNDER MANAGEMENT

|                                                                             | Change from previous month | Outstanding amount, SEK |
|-----------------------------------------------------------------------------|----------------------------|-------------------------|
| On-lending                                                                  | 165 108 671                | -7 821 566 078          |
| Assets under management                                                     | 2 014 710 206              | -1 347 262 170          |
| D. CENTRAL GOVERNMENT DEBT INCLUDING ON-LENDING AND ASSETS UNDER MANAGEMENT | -43 022 746 414            | 1 092 379 777 829       |

The Central government debt is calculated as the value of outstanding debt instruments, mainly bonds and treasury bills, at the reporting date, calculated in accordance with established principles, see below. Within the framework of debt management are also certain assets. There are funds temporarily invested in the money market until they are used to pay expenses in the state budget or maturing loans. The assets mean that the actual liability is less than the sum of outstanding debt instruments. This report presents both the liabilities and assets since our aim is to achieve a fair and transparent reporting of government indebtedness.

Nominal (face value) amount (in A above) is the sum of the amounts that the Debt Office is committed to paying when a debt instrument matures and receives at maturity if it is an asset. The amount is reported in SEK at the exchange rate at the time of borrowing. The next step in the calculation of public debt (in B above) is to report the nominal amounts at the current exchange rate and add the accrued inflation compensation for outstanding inflation-linked government bonds (this measure is called the uplifted amount at current exchange rate). These measures show the government debt when assets under management is taken into account.

The official measure of government debt (in C above) is defined based on principles laid down at EU level. It accounts for the Central government gross debt, without regard to the assets. To obtain this measurement, we add the financial assets to measure B.

The Debt Office also reports "Central government debt including on-lending and assets under management" (under D above). This includes not only the assets under management but also certain other financial assets, namely on-lending to the Riksbank and foreign states. This measure is used in the management of government debt in accordance with guidelines adopted by the government and in our internal risk management. On-lending is a government claim, but not in the same manner as assets under management available for payment of government spending.

Liabilities are reported with a positive sign and assets with a negative. Change refers to a change of the nominal amount from the previous month. The account is based on business day. However, note that issue date and maturity date refer to settlement date.

## CAPITAL MARKET

### Government bonds

| Bond                      | Date of Issue | Time to Refixing | Change         | Nominal amount, SEK |

Note: Balances in bank accounts are recorded using settlement date accounting. The adjusting entry contains amounts on the way to or from the bank account that have not yet been paid and are therefore in a clearing account for the Debt Office's accounting purposes. The sum of the balance in the bank account and the adjusting entry determines whether a bank account balance is classified as a liability or an asset.

### Collateral

## AVERAGE TIME TO REFIXING AS MEASURED IN RISK MANAGEMENT

The government decides on guidelines for central government debt maturity and the distribution between types of debt: Nominal krona debt, Inflation-linked debt and Foreign currency Debt.

The measure of debt used in risk management is the central government's uplifted amount at current exchange rate including claims in on-lending and assets under management. Positions taken with derivatives to actively manage exposure in the debt is not included. Derivative transactions affecting the allocation between different debt classes is on the other hand included.

The maturity is measured with Average Time to Refixing. The table shows the debt measure used in risk management as a monthly average.

### Average Time to Refixing in the Debt Office's risk management, monthly average

|                       | Debt measure<br>risk management | Average Time to Refixing<br>monthly average |
|-----------------------|---------------------------------|---------------------------------------------|
| Nominal krona debt    | 845 517 055 219                 | 4,98                                        |
| Inflation-linked debt | 211 023 536 468                 | 4,17                                        |
| Foreign currency debt | 47 578 987 177                  | 0,14                                        |
|                       | 1 104 119 578 863               | 4,61                                        |

### Average Time to Refixing, year, monthly average

The maturity targets (Time to Refixing) are from 2025:  
Central government debt, within the interval: 3,5-6 years

— Government debt, years  
— Higher target, years  
— Lower target, years

Central government debt

— Nominal SEK debt, years  
— Inflation-linked debt, years

Nominal and inflation-linked krona debt

**Foreign currency exposure: Central government debt's foreign currency exposure is to be gradually phased out with the guideline value being zero as of 2027**

— Foreign currency debt at actual exchange rate, SEK bn

Foreign currency debt
